

# METAL FRAME POOL

**NO TOOLS  
REQUIRED**

**NO SAND  
NEEDED**

**READY FOR WATER  
IN 30 MINUTES**

**NEW RUST RESISTANT  
GALVANISED STEEL  
FRAMES**

**THE "EASY SET-UP" ALTERNATIVE TO  
STEEL WALLED POOLS**

Now Intex has the manufacturing capability to fabricate steel frames for family size above ground pools.

- Pool is easy to set up-no tools required (filter pump and ladder need a screwdriver for assembly).
- SUPER-TOUGH sidewalls are triple strong. Made with 3 separate layers of material for extra strength and durability - two outer layers of heavy-gauge PVC laminated to an inner layer of polyester mesh for extra reinforcement - a total thickness of 28 gauge (0.71).
- Separate laminated band provides additional wall support.
- Reinforced polypropylene ropes wraps around the bottom of the pool liner to keep the legs firmly in position.
- Convenient drain plug for easy draining. Connects to garden hose so the water can be drained away from the pool area.

With the added structural strength of galvanised steel, frame pools can now be manufactured in even larger sizes, such as our new 18' diameter ( 549cm) pool with a 4' (122cm) depth, which is capable of supporting over 6,000 gallons (22, 710 L) of water.

**SET UP AS EASY  
AS 1-2-3**

**18' x 48"**
